### **HOW ACCURACY WORKS**

Let  $a$  be the base accuracy of a Hoobagee, at level  $L$ , with special stat  $P$ . The Hoobagee's accuracy  $R$ , (between 0 and 1) is then:

$$R = 1 - a \exp\left(\frac{L}{25P}\right).$$

### **DAMAGE CALCULATION**

A Hoobagee with ATK  $A$  and Special  $P$  can do

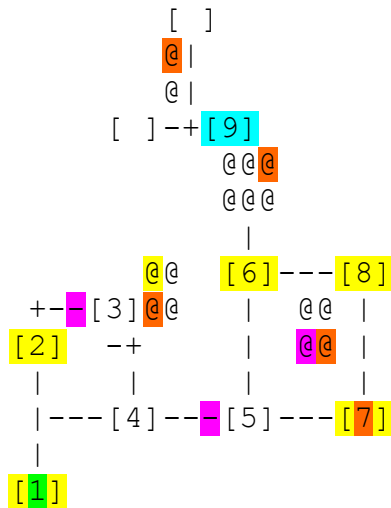

$$D = A\left(1 + \frac{P-2}{6}\right)$$

damage with their special attack. If they have a type advantage on the opponent, they deal

$$1.2D$$

damage.
