

CD Steamtables on pocket calculators

The CD contains programs for the calculation of the substance data of water and steam originally to the Industrial-Formulation IAPWS-IF97 for the following pocket calculators:

- CASIO CFX-9850G and GB Plus
- CASIO ALGEBRA FX 2.0
- Hewlett Packard HP 48G and HP 49G
- Texas Instruments TI 83, TI 83 Plus, TI 84 Plus
- Texas Instruments voyage 200, TI 89, TI 92, TI 92 including memory extension and TI 92 Plus.

The accompanying directories contain the installation files from the PC to the respective pocket calculator and the User's Guides as PDF files.

The programs represent Freeware for a not commercial use.

Furthermore, analogous programs for TI voyage 200, TI 89 and TI 92 Plus for the calculation of the substance data for ideal gases and mixtures from VDI 4670 and for humid air can be requested.

In addition, license substance data program libraries for MS-Excel and Mathcad are available for free.

Please, send questions and/or indications to the hereinafter address.

It wish you much success with the programs
