

Hello fellow physics student!

In these two folders are every equation we used in my highschool AP Physics class organized into easy-to-use menus. To use this program, simply copy ALL FIVE FILES onto your calculator using TI-Connect. They are ALL required. If you send this to someone else's calculator, you will need to also send all five files or else the program will not work.

I have included versions extracted from my calculator in both Windows and Mac, I'm not sure if that makes a difference, but I wanted to make sure to include both just in case it does.

Good luck and FIVE FIVE FIVE.

Ben Perkins
