It's an extra light version of the famous Master Mind: easy and fast to play!
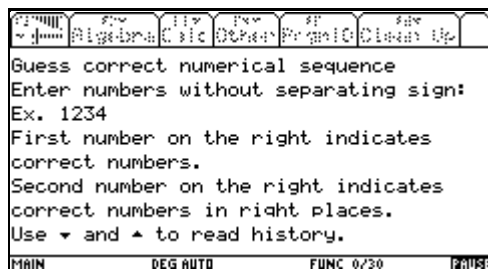

Guess correct numerical sequence. Enter numbers without separating sign
Example: 1234
First number on the right indicates correct numbers. Second number on the right indicates correct numbers in right places.
Use arrows to read history when the matrix is greater than screen.
You can find this information also in the Help menu of the program.

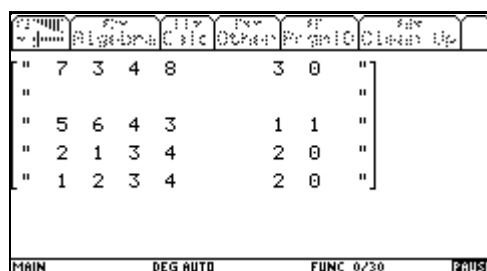

Game example

Enter: 1234

Enter: 2134

Enter: 5643

Enter: 7348

Enter: 8473

Enter: 4893

Enter: 4703

This program has been already used many times without problems. If you find any bug first assure you to have selected the English language in the Mode and not to have translated the code with any program. If the problem persists, please, let me know.

For a better and faster answer, please, enclose some screenshot of the bug: entered inputs, expected outputs, error messages, erroneous code line, Mode setting… it will help me very much!
