Custom error for Ti-92+ and Voyage 200

Date Created: 5/7/2023
Creator: Qhgreen(9x)
Platform: Ti-92 and Voyage 200 Calculators.

I.   How to use
Edit the
:Text "No One Asked"
line and change it to whatever. then, execute thing(). Your error should display.

II.   More info.
This program was made with basic, using an app on my phone called graph 89. because it's a .9xp program, it was made for the ti-92+. The voyage 200 is backwards compatible with the 92 Plus, so it should run on there as well.

III.   Legal.
This program, along with most others released to ticalc throughout its 27 year history, is freeware. That means Custom Error is distributed at no monetary cost to the end user (You). Please credit me and keep the .zip file intact if you choose to distribute this on your own website.

IV.   Credits
Qhgreen(9x(Me))- I made this program.
Dritan Hashorva- For creating Graph 89, the app I used to create this
You- For checking this program out.
