

# TI-84 Plus Font

## For the TI-84 Plus CE

---

The font for the TI-84 Plus is a classic, and appeared on many calculators in the past. Since the TI-84 Plus CSE, the font changed and some users weren't jazzed about it, and preferred the older font because of how simple it was.

But how can you change the font for the TI-84 Plus CE? Don't you need to learn z80 assembly? Yes!

Thanks to **Iambian and his font editor**, I have ported the TI-84 Plus OS font to the CE for you to relive the good days of the typeface.

### How to use

For operating systems 5.3.0 and above, run it in RAM or archive (recommended) like a BASIC program. Once installed, it will show 'Font installed.'

For operating systems below 5.3.0 (you really should upgrade to 5.3.0 at least), unarchive it and use with Asm() or run with Cesium.

Run again to uninstall.

### Important Notes

The installed font is temporary and will be uninstalled automatically if..

- RAM is cleared
- Garbage Collect was done

**PLEASE NOTE THAT THIS FONT IS NOT COMPLETE!**
